

Sending Entities Into The Light

A Short, Simple and Effective prayer is at the end of the page.

Remember: Everything, everyone, every human, every non-human, every spirit, and each and every awareness, what we perceive and describe as Light and what we perceive and describe as Dark, is an entity. As an example, all of the following are entities: the earth, a rock, a grain of sand, a street sign, each hair on our heads, each molecule that makes up our hair, each atom that makes up the molecule, each proton, electron and neutron. The energies that make up all of these things are entities. This can be expanded in all directions infinitely.

If you get side tracked listening to entities it will slow your progress. The oldest and wisest sages say to pay no attention to the phenomena along the path. This is sage, safe advice, and is often difficult for westerners to take. We are too curious. If you choose to pay attention to the entities, results could be embarrassing at the least, and disastrous at the worst. It is best to avoid 'conversations' with them, especially while you are learning to send them to the light.

Most entities we perceive as 'dark' feed on emotional energy (fear, anger, guilt, shame). They stay away from LOVE. The more they can get you riled up, the bigger the buffet. Your emotional energy is their food. Without it they cannot continue to exist. They are parasites, and they may use flattery, predictions, warnings, or pranks to provoke your emotional reactions. Some entities may go on and on about how unique and special you are.

Yes, we are all special and unique in Great Spirit's eyes, regardless of who we are and what we do! Infinite manifestation creates uniqueness, and all of creation is special, loved and cherished - from the smallest pebble to the greatest leader.

Where your attention goes your energy goes, so flattering you that you are Napoleon or Cleopatra reincarnated is a way for them to feed on your energy if you believe the flattery.

Funny, too, how the entities tend to stick with what works. How many people have been told by their guides they had been "Keeper of the temple in Atlantis"... It means they were the janitor, I think! The Atlantis temple must have needed a lot of staff to do the cleaning up, like Disneyland...

Beware of guides, human or discarnate, who want to give you a fancy title or special name, and tell you that you have some special mission to save the world.

On the other hand, sometimes entities that appear very dark and scary at first, turn into angels if you can love them unconditionally. **The scary appearance is to give you the option to exercise your free will choice to love or fear.** They are a reflection of your own fears, and loving them releases the fear blockage within you.

The genuine guides know, "Change the world by changing inside yourself." The even wiser ones know, that the world does not need changing, everything is unfolding as it should. True spiritual beings know that the world is perfect in Great Spirit's eyes, and all is Great Spirit, so what needs to be "saved?"

Sending entities into the light is very easy, There are dozens of methods. Simply asking your Guardian Angels to take the entities into the light works very well. Every animal has its territory and home, and the right and power to defend its space. You have a Divine Right to be sovereign in yourself, and Angels will be the enforcers of that, if you ask them.

If you are hearing (or seeing) a ghost or an entity, it is usually very easy to clear. Even the one out of thousands that is more difficult to clear will eventually come around to be transmuted, when it was loved enough.

Love is all that is. Sadly, beings that are polluted with fear sometimes do not know that they are love. They need to be shown LOVE to remember they are LOVE.

Make sure you ask for Angels of Love and Light. My way is, "Great Spirit and Great Spirit helpers as are best..."

My basic prayer for sending entities into the light is:

“Great Spirit, show this entity's spirit, soul and being Your Pure Divine Love and Light.

Help it recognize, get used to, accept and embrace Your Pure Divine Love and Light.

Bring it home to You as soon as it is ready and it is time.

Do what is best with it and for it. *Thank You.*”

This prayer can be said for deceased animals and people too.
